Professional Summary

Frontend Developer with 3 years of experience in building scalable and responsive webapplications using Angular (v9–18), TypeScript, and RxJS. Strong background in designing reusable components, optimizing UI performance, and writing maintainable unit-tested code. Experienced in RESTful integration, Firebase, Node.js, and C#. Passionate about clean architecture and delivering user-focused solutions.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript.
- **Frontend:** Angular, HTML5, CSS3, Bootstrap, Angular Material,PrimeNG.s
- **Backend & Database:** Node.js and Firebase.
- **Tools & Platforms:** Git, NPM, Postman, VS Code, GitHub, Agile, REST API,Cursor.AI Editor.
- **Testing:** Jasmine, Karma, Angular TestBed, Unit Testing

Experience

Software Development Engineer|Hubstream India

Dec 2023 – Jun 2025

- Developed and maintained Angular-based UI for case management software used by enterprise clients.
- Built 10+ reusable components, increasing development speed by 35%.
- Reduced Angular unit test runtime by 40% through optimized test setup.
- Wrote 100+ unit tests covering components, services,Directives and pipes (90%+ test coverage).
- Automated reporting for test coverage and failures, reducing manual QA time by 60%.
- Resolved 50+ production issues, improving platform stability and reducing downtime.
- Collaborated with the squad to handle weekly application deployments.

Graduate Engineer Trainee| BLP Industry AI Pvt Ltd

Jul 2022 – Nov 2023

- Designed front-end dashboards for 3 major industrial clients, improving usability and data visualization .
- Improved system performance by 30% and ensuring 99.9% reliability.
- Built dynamic Angular applications with clean code adhering to industry standards, enhancing user experience and reducing code maintenance time by 20%.
- Integrated Firebase for real-time alerting, reducing response times by 30%.
- Delivered 10+ full-stack modules involving REST API integration.

Projects

Trust AI | Frontend (Cloud)

- **Objective:** – Computer Vision Surveillance (Angular, Firebase, AI Integration): Built UI for smart surveillance alert system, improving incident detection by 35% and reducing false alert rate by 20% .
- **Clients:** Suvidha,BIAL .

Spot AI | Frontend (Onpermise)

- **Objective:** Trolley Tracking System (Angular, Node.js, Real-Time Monitoring): Created tracking interface reducing trolley misplacement by 50% .
- **Clients:** HUL .

Spot AI | Frontend (Onpermise)

- **Objective:** Trolley Tracking System (Angular, Node.js, Real-Time Monitoring): Created tracking interface reducing trolley misplacement by 50% .
- **Clients:** HUL .

Dataspace | Frontend and Backend (Cloud)

- **Objective:** Investigative case management, link analysis and visualization, and hyper-customizable workflows .
- **Clients:** Hubstream .

NPM Packages

- **node-fire-storage** : Connect with Firebase storage for file operations .
Github-Url: (<https://www.npmjs.com/package/node-fire-storage>)
- **search-io** : Client-side search implementation using search.io .
Github-Url: (<https://www.npmjs.com/package/search-io>)

Personal Projects

- **Launchpad** : Tool for local deployment and app hosting with simplified setup .
Github-Url: (<https://github.com/sanjaykrishna1212/launchpad>)
- **Chat-io** : Offline chat interface for on-premise use .
Github-Url: (<https://github.com/sanjaykrishna1212/chat.io>)

Education

- | | |
|--|-------------|
| Rajalakshmi Institute of Technology Bachelor of Engineering (B.E.,CSE) | 2018 – 2022 |
| • CGPA: 8.23 | |
| kamaraj Matriculation Higher Secondary School HSC Tamil Nadu StateBoard | 2017 – 2018 |
| • Percentage: 80.25% | |

Certifications

- **Course Name:** Angular 8 Certification – Basic to Advanced Level
- **Platform:** Udemy
